Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/04/2007 has been entered.

The anticipation rejection over 6093814 is overcome by the "isolated" requirement. Likewise, the "crystal" of claim 18 avoid anticipation. There is no motivation present to isolate or to convert into crystal form the tributyl ammonium salt of tritylated cefdinir so no rejection under 35 USC 103(a) is made.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1624

It is unclear what is entailed by "isolated": Isolated from what? Is it isolated from something, e.g. just from a reaction medium, or is it isolated from everything, i.e. pure. The specification gives no guidance, as the compound is not described as isolated.

Claims 1-16 and 18 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for Z choices 2, 3, 10-14, does not reasonably provide enablement the others. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

The adducts of the strong acids are not enabled. Thus, for the first choice, the adduct is of HCl, i.e. an HCl salt. As soon as the amine is added, it will neutralize the HCl present. Only after all this HCl is neutralized can the actual salt be formed. Thus, the adduct does not form.

Claim Objections

Claims 1, 13 and 15, third from last line, each have a raised number 2 which should be subscript.
